Allowable Subject Matter

Claims 1-16 are allowed.

The following is an examiner's statement of reasons for allowance: regarding claim 1, patentability resides, at least in part, in the cooking assembly having a safety device having at least one spring-biased latch disposed in a socket casing of a tray unit having a base member, the latch engages the base member when the latch is disposed at a second position, and disengages the base member when the latch is disposed at a first position, in combination with the other limitations of the base claim; regarding claim 12, patentability resides, at least in part, in the cooking assembly having a safety device having at least one spring-biased stop member disposed at a stopping position, the stop member having opposite ends, the first end of the stop member is disposed at a position within a sensor passage when the tray unit is detached from said base member, preventing extension of the temperature sensor through the sensor passage, the second end of said stop member contacting and being pushed by an engaging part upon mounting of said tray unit on said base member such that said stop member moves in a transverse direction relative to said sensor passage, in combination with the other limitations of the base claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
